STRATHMORE HARDWARE

VOL. IX., NO. 18

STRATHMORE, ALBERTA, FEB. 6, 1918.

Subscription Price, 1.50 per year

Feed Rockledge Poultry Tonic to your hens. Sold and guaranteed by S. O. LOONES 18-6 in pd

The Red Cross Society will pack a box of finished wool on Saturday afternoon, February 9. Will all those who have work kindly hand it at the office real early. Office will be open from one o'clock

LAND

We have listed with us, Five Farms, all quite close to Strathmore, and all at remarkably low prices, and very good terms.

FRANK T. McELHOES

Mrs R. A. Brown returned home this week.

The Anglican Church Guild met at the home of Mrs. Hyde on Tuesday.

The Presbyterian Ladies' Aid met at the home of Mrs. R. A. Anderson on Tuesday.

Rev. A. C. Swanson, of Bassano, will conduct the service in the Anglican Church on Sunday morning, next, at 11 a. m. There will be a celebration of the Holy Communion.

If you feed Rockledge Poultry Tonic to your hens, sold and pleased with results. Sold by S. O. LOONES 18-6 in pd

Particulars will be found in advertising columns of a big "spring horse sale, which will be held in Strathmore on Saturday, March 24th. Auction Mart Co., Ltd., This sale is the largest ever held in Strathmore. Present entries consist of 100 head of horses, (all local breed) and 30 head of cattle. The entries date will be announced in our next issue. For all details of buying good stock should attend this sale, as the entries are all good stuff.

In our issue of January 23rd, we had a paragraph relating to the Hard Times Dance at Nakata, in which reflection was cast on the character of a local gentleman. We understand that the gentleman in question paid all that was asked of him. We are sorry if the article caused him any inconvenience.

—LOST \$5.00 bill during week-end. Apply Wears, Barrister.

By feeding Rockledge Tonic, I increased my egg yield 400 per cent in two weeks. S. O. LOONES 18-6 in pd

Plymouth Rock Roosters for \$1.50 each. Apply to Mrs. ANSON BARNETT, Strathmore, Alta. 3 ins.

Mrs W.C. Brown left on Friday last for the States.

Captain Main left last week for the States.

W. G. Way and Angus Watson are attending the Convention of Rural Municipalities, which is being held in Edmonton this week.

A meeting of the U.F.A. was held in the Fire Hall on Saturday, there being a good attendance. The report of the delegates to the Conference were received with satisfaction. Considerable interest being taken in the matter of Hall Insurance. The membership fee for the year was fixed at \$2.00. The next meeting of the U.F.A. will be held on Saturday, 16th at 2.30 when the matter of a "rural business" will be discussed. All business interested in the above is invited to attend. The proportion is to issue 250 shares at \$30.00 per share to capitalize the undertaking.

Mr F. J. Hartle, who farms west of town, has purchased a big ranch 18 miles west of High River. The ranch, which is considered one of the best in the district, contains a section of lease and 2000 acres of deeded and. There are over 400 head of high grade Hereford cattle, besides a big bunch of horses on the ranch. We understand that the purchase price is somewhere in the neighborhood of \$80,000.

Miss Ida Anderson, of the Union Bank Staff, who returned last week from a visit to the States, says that the feeling that Canada and the States are being drawn closer to each other was very noticeable. In a window in Portland, Oregon, she observed a large sign, bearing the following words: "Join the American or Canadian Army. If you can't join one, join the other."

ALBERTA'S GREATEST DAILY

The War

DAY by day the grim fight for freedom goes on. Who among us is not interested in its progress? Many are vitally concerned. Fresh news, authentic news, is demanded. So there is maintained at immeasurable cost a vast system of news-gathering. Its product is supplied to those newspapers who can afford to buy it. The price is high. Since the world awoke to the awful tragedy of the war THE HERALD has spared neither effort or expense to supply its readers with a full, authentic War News Service.

Briefly, The Herald carries more real news than any other paper published between Winnipeg and the coast.

EXCLUSIVELY, THE HERALD PUBLISHES—
Special cable reports by Windermere and Mc-
Kenzie, both closely in touch with Canadian
troop happenings at the front. Also the full
news service of the Canadian Press, etc.,
that of the United Press.

Would Revise School Histories

idea to eliminate passages tending to antagonize either U. S. or Canada.

With a view to bringing even closer relations between Canada and the United States, between the United States and Britain, it is suggested that a careful revision of the school histories of the two countries, in order to eliminate passages which might tend to create or perpetuate antagonism, be made by an international committee. To this end the Foreign Policy club of Ottawa has called upon the Canadian citizens, J. Terence Anglin and J. Armitage Ewing, K.C., to prepare an outline of the proposed revision for the various universities and leading public men of the country in giving their support to an educational campaign along the line suggested.

Hard and soft corn both yield to H. D. Ewing's Corn Cure which is effective in curing corns and satisfactory in its action.

Britain to Pay All her Debts

Her War Indebtedness Will Not Be Repudiated, Says Bonar Law

Great Britain will not repudiate her war debts, says Bonar Law, the chancellor of the exchequer in an open letter, which he has caused to be read in the House of Commons. He denies rumors that the country would fall to meet some of the debts, and says that the debts can be paid off in full.

"I am glad to have an opportunity of making this statement at the present time, when the attention of the country is so much

engaged throughout the country with regard to the possibility of the government's being overthrown."

"I should like to state that state as strongly as I can, that in my opinion, the only course which, in the present or future, will seek to break faith with those who have placed their trust in us is to repudiate the debts incurred in the state of this crisis of history. Such a policy would not only mean the bankruptcy of the United Kingdom but the lands of the United Kingdom were in the hands of men who were blind to all considerations of justice and right. The debts of my government that adopted it—

"I would, in my judgment, be as disastrous as it would be dishonorable. Not only would it be of the greatest importance to preserve and buttress the fabric of the national credit and the credit of the country, but it would be as the refusal of the government to honor its debts. It would, indeed, be a national bankruptcy."

"I will only add this: Whatever be the financial policy of the British government after the war, I am certain that it will be a wise one. There may be still not in favor of those who have withheld their money from the country at a time when its needs were greatest."

Minard's Liniment Cures Colds, etc.

Another "Fine Sight"

Mistery Instructor—"To high school girls. Don't you know what a fine sight is?"

Fitz. Jones—"That I do. It's plain to see that you're potatoes and a tankard of real beer."

—*Continued from page 1.*

The British Way

The Anglo-Saxon Way as Opposed to the Teuton Method

General Allenby, the conqueror of Jerusalem, entered the Holy City with his army in the rear, and the subduing of the officials.

He placed strong guards about all the important buildings, and the exercise of authority and assurance in the people in several languages. Among these he placed the French, the Greek and Russian. His German plan was delayed because of his unwillingness to go into the city and to stand guard the sacred city.

A reverential respect for things historic and holy was shown by the English, and the British way, and it explains her success in ruling subject peoples.

Her policy of the annexation of Brussels and her brutal behavior there! These two come to mind. The world has seen the subduing of the officials.

He placed strong guards about all the important buildings, and the exercise of authority and assurance in the people in several languages.

Among these he placed the French, the Greek and Russian. His German plan was delayed because of his unwillingness to go into the city and to stand guard the sacred city.

A reverential respect for things historic and holy was shown by the English, and the British way, and it explains her success in ruling subject peoples.

What Waste Costs

The waste of 300,000 pounds of paper a week, Canadian authorities estimate, is due to the carelessness and in spite of English losses the waste process is still continuing.

General Allenby's plan of defeating Lee is working against Germany. With the addition of an English army to the German, the control of the sea, with the drawing of the fangs of the British, the English will be able to stand up to the Germans.

MUST BE A GREAT SPEEDING UP OF AGRICULTURAL PRODUCTION

THE CALL TO THE FARMER IS MOST INSISTENT

Necessity for Speeding Up on the Farms of the Dominion was
Never so Urgent as at the Present Time, and Authorities
Should Take Action to Secure the Required Help

300 day with growing interest, the call of the farm for labor is here. If Europe is not to suffer from a stamp on a scale heretofore unknown and unprecedented, there must be a great speeding up of agricultural production on this continent. The demand for foodstuffs is not far short of the normal consumption, and it shipping were available, the demand for foodstuffs and meat to be found in Australia, India, and South America to meet the little-danger of serious shortage. But shipping is not available in sufficient tonnage to meet the demand, and required to bring the food surplus of the Orient and of South America to Europe, and to meet the demands of Italian consumers. The North American continent, because of its proximity to Europe, is destined to be the chief source of food supply for the allied nations until the end of the war, and in the earlier stages of reconstruction.

The necessity for speeding up on the farms is now as urgent as ever, so urgent as it is today. Yet it is doubtful whether Canada, during the course of the war, will be able to large a surplus of food for export, as in the earlier years of the war, when the world was at peace. The most careful observers, including the heads of the farmers themselves, state that there will be a marked departure from the farms—partly altogether from the scarcity of labor due to the operation of the draft, and partly to maintain production even at the level set in former years. Mr. Hart Frankland, the Minister of Agriculture, and who is in a position to understand the true condition of the farms, as well as the food situation, made a strong appeal in yesterday's issue of the *Standard* to all those who can, not to be made to yield their acreage to the government, and to the coming season. He says:

"It is up to the citizens to organize and send up to the farm during July and August half a million laborers this coming year, or farmers will be forced to grow grain or food. They will be forced to turn good land to waste, and they will turn good when the grain goes into pasture. We must respectfully request those who can and know how to organize to do all they can to help before it is too late that we can give assistance to harvest his grain, wheat, oats, barley, corn, flax, other cereals and stores and warehouses, as necessary, and let us have volunteers. The time is now—tomorrow, wait not for to-morrow."

Mr. Frankland's call is for volunteers. But are not volunteers to grow grain and food necessary to the success of the call? It is true, why should not the principle of self-sacrifice be applicable to the growing of food as to the other arts? British penalties for the farmers who grow wheat and oat ground into grain land, and who insist on the breaking up of pasture land, are severe. But in doing so, the men charged with the task of saving the British supply of home-grown food, see to it that farm labor is provided where it is needed. The men who were released temporarily from the old last spring to get in the crop, and who are now available to direct women's labor to the farms, although compelled, is not yet applied.

Ought not similar measures to be taken in Canada? Among the hundreds of thousands of men called up for service from time to time under the military service act, there are many who are not accustomed to farm work, and who could be used to advantage early in the year in the breaking up and sowing the crops. The military department does not propose to call up men who have not been called up for training. It may be well into the summer before the last call comes for men to go to the farms to utilize now for farm work some of the men who are not to be included in the drafts to be sent to the dominions?

There are other sources of farm labor that should be drawn upon without hesitation. Government officials, men and women who come from the farm and are still able to do farm work, should be called up. The call to war effort were the announcement to be made that the members of the dominions and the United States, had, by lengthening the hours of labor as voluntarily increasing the men, done a work of one thousand men and women to aid in food production. The call for volunteers to go to the farms, and the men and stores would come with much greater force from men who, as veterans of the war, are anxious to follow their example. "Come on" is always a better cry than "Go on."

The soil of Canada should be used to the best possible advantage in the production of grain, dairy products and food animals from now until the end of the war. It is the duty of the government to see that land capable of use is not held idle for lack of labor. The work should be performed without recourse to the principle of compulsion there should be no draft of men to the farms. Help in Canada, with peace and prosperity surrounding us, we do not yet understand that our own liberties and our

The Zeppelin is a Failure

Germany Has Only Thirteen Airships Left of a Fleet of Fifty-three

Germany's Zeppelin program, announced in 1914, has been a failure, 1914, stands a dreary failure today.

Accurate figures show that of fifty-three Zeppelins built by the Germans since 1914, thirty-five have been destroyed, two have been badly damaged, two possibly destroyed, now missing, and one is badly damaged and temporarily out of commission.

Of the thirteen remaining, six are serving in the British army, and

one is in the British air force.

Two Zeppelins were lost in the North Sea, two to the British and three as experimental school ships.

England and Belgium have lost the German zeppelins, eight having been

downed in France and four in Belgium.

Germany's air force, by the way, has suffered a heavy loss.

Zeppelin numbers, according to accurate calculations, started with the

first Zeppelin in 1914, and were

25 and 30 not have been em-

ployed, leaving 33 to be accounted

for.

L-1 and L-2 were destroyed before

World War I, and the second was accidentally

burned at Friburg.

In addition to the loss of 33, the

losses of the German air force

are as follows: 1914, 1915, 1916,

1917, 1918, 1919, 1920.

GIGANTIC TASK OF THE BRITISH NAVY

CHIEF BUSINESS OF THE GERMAN NAVY IS TO KEEP FROM BEING SUNK

When Lord Salisbury traded the Island of Heligoland to Germany, it may be, at the suggestion of Queen Victoria, he made the present war possible. The German navy, which is in possession, Germany would never have run the risk of fighting Great Britain. The British navy, 2,000 miles from the German navy bases and in British lands would compare with the German navy, had Britain remained British. Germany would have chosen some other port than Heligoland, and the British naval base, but that would have entailed great disadvantages. Today the British navy is 2,000 miles in area and rising to a height of 1,000 miles. It is not so powerfully fortified but it is as efficient as the German navy.

It is a harbor and shelter for marines, destroyers, light craft, transports, and supply ships. The waters are shallow enough to be effectively mined to the coast and make it difficult for the British enemy vessels to pass except at considerable loss. Underhandedly or openly, Germany has lost possession of Heligoland.

The Grand and others slope the coast give Germany a great advantage in the war against Great Britain. Writing in the New York Tribune, Mr. Gheorghe Davis says that our own coast is more difficult to be exceeded in difficult for hostile ships to deal with. On the other hand, the British navy has the British lands on the British coasts which are exposed to German attack and the British navy makes it impossible to be successfully counteracted by mines. The British navy can choose to take the risk of encountering British destroyers when they need not do so. The British navy has the certain English coast towns, especially those that are not subject to military ports, so that there are thousands, perhaps millions, of ships that are not subject to the North sea but they are in certain zones and not intend to leave. Numerous canals and narrow channels are known to Swedish and Dutch sea captains, there is not the slightest reason why they may not easily well know to German ports.

With the Germans have not done more bombing of the undefended English towns, it is not clear to Mr. Davis. He says that the British can be expected for these attacks. He notes the tremendous more difficult work that the British navy has to do when compared with the duties of the German navy. The latter are comparatively safe and have a "safety first." The chief business of the German navy is to keep from

being sunk; the duty of the British navy is to keep the North sea clear. The British destroyers and light cruisers are constantly on duty well off shore and the British navy has the ships that are at sea. They are not protecting British coasts by hounding the British navy, but the British navy as the mine fields will permit.

Only one occasion was the whole

of the Inland battle, about which con-

cerns are to be had.

Watch for the posters of the Beauville entertainment on February 27th

The newly-organized branch of the Canadian Red Cross Society held a mass meeting in the Methodist Church on Tuesday evening to give the members a further insight into the great work that this Society is doing among the boys at the Front and in the hospitals. There was a good attendance.

Mayor W. R. Lambert

took the chair, supported by the speakers for the evening, Lance-Corporal Hatcher and Private Crosby, both of whom have seen service with that glorious battalion whose noble deeds are well-known all over the British Empire and whose doings Canadians look upon with pride—we refer to the Fighting Tenth—and both of whom have been wounded in the fight for justice and liberty.

In his opening remarks Mayor Lambert gave a brief resume of the origin of the Society and spoke of the great and good work they had done since their formation. The Red Cross Society was doing a great work in this war—more so than the average person knew. Although the local branch had only been formed a short while, he was glad to see that they had a large membership, which showed that the people of Strathmore realized what the Red Cross Society did and wanted to assist in their determination to help on this splendid work. Who knew, but that in working for this Society they might be helping some of the Strathmore boys.

Mr. R. S. Stockton then addressed the meeting and gave a very thoughtful and inspiring address based on the words "Do unto others as ye would they should do unto you."

Lance-Corporal Hatcher then gave an address on the work of the Red Cross Society and related what they had done for him; he also spoke of some of the atrocities committed by the Hun, the effects of which he had seen himself, and read extracts from some of the boys who had derived benefits from the Red Cross.

Private Crosby, a member of the "Fighting Tenth," and who at one time worked in Strathmore at the C.P.I.D. and who has 52 wounds caused by a shell, gave a very interesting address on the work of the Red Cross from his own experience and stated how much the boys appreciated the parcels which were sent by the Red Cross and how they assisted the work the Society was doing.

A musical program was rendered by the following—Mrs Green and Messrs Patrick and Meaker, Mrs. McVitty accompanying. At the suggestion of the Mayor a hearty round of applause was accorded the entertainers.

The meeting then closed with

FOR SALE—1916 Ford, in good running condition. Apply J. D. Kruse, Brown's Garage, Strathmore.

LOST—Grey Yearling Filly, branded 2 on right shoulder. Reward for information leading to recovery. J. Kruse, Strathmore.

STRAYED—From Namaka, 3 year old Dark Brown Filly, white stripe on face, white blaze on forehead. Reward \$50 reward for information leading to recovery. P. Smeston, Namaka.

FOR SALE—300 lbs. Seed oats for Cattle—ARTUR MEYER, 13½ miles South of Strathmore.

Complete Service to Ford Owners Everywhere

COURTEOUS attention to your needs wherever you may travel is something you appreciate, and being a Ford owner you can get it. You are always "among friends".

There are more than 700 Ford Dealer Service Stations throughout Canada. These are always within easy reach of Ford owners for gasoline, oil, tire, repair, accessories, expert advice or motor adjustments.

The cost of Ford Service is as remarkably low as the cost of the car itself. Nineteen of the most called for parts cost only \$5.40. Just compare this with the cost of spare parts for other cars and you will realize the advantage of owning a Ford.
